

LearnHub

A learning platform for courses, progress tracking and assessments.

ROLE	TYPE	CATEGORY
Full-Stack Developer	Personal / portfolio project	Education / EdTech

OVERVIEW

LearnHub is a learning platform covering course discovery, lessons, progress tracking, assessments and learner dashboards, alongside instructor tools for managing content. The interface was built with accessibility and responsiveness as first-class requirements.

KEY FEATURES

- Course discovery and enrolment with category and level filtering
- Lesson player with progress tracking across modules
- Assessments and quizzes with score history
- Learner dashboard summarising progress across active courses
- Instructor content-management views for courses and lessons
- Accessibility-focused, responsive layouts throughout

MY CONTRIBUTIONS

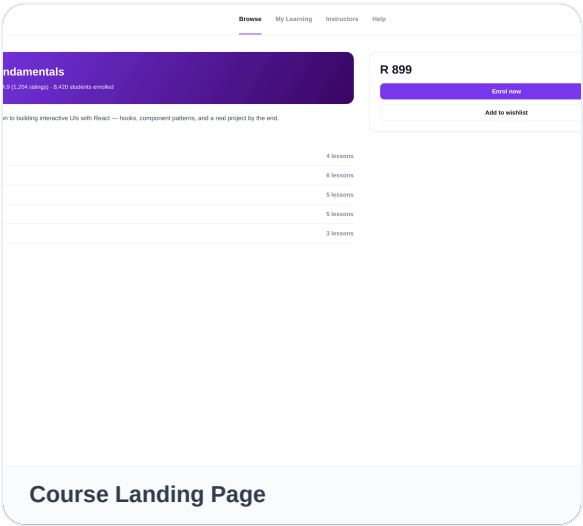

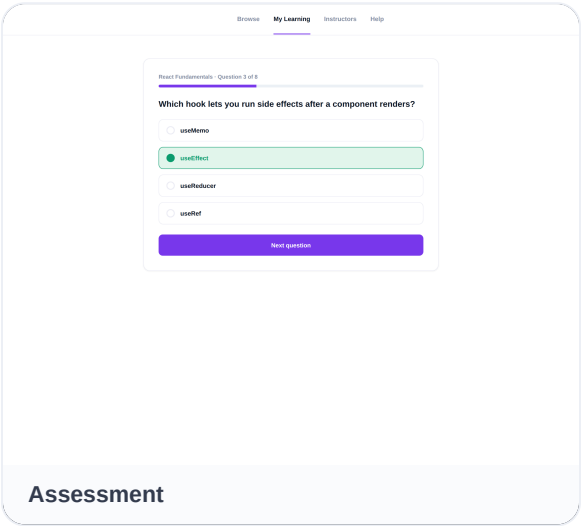

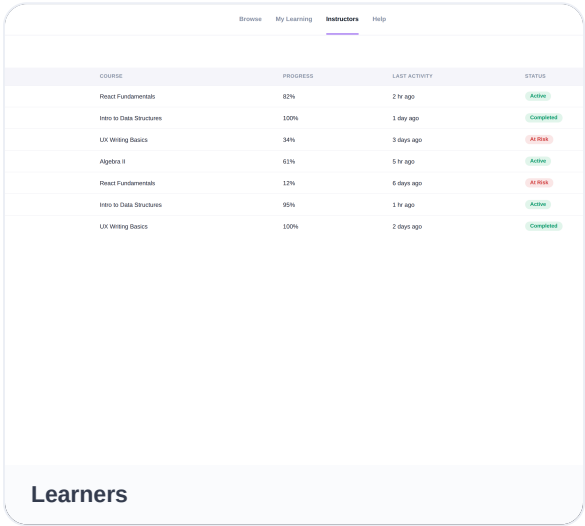

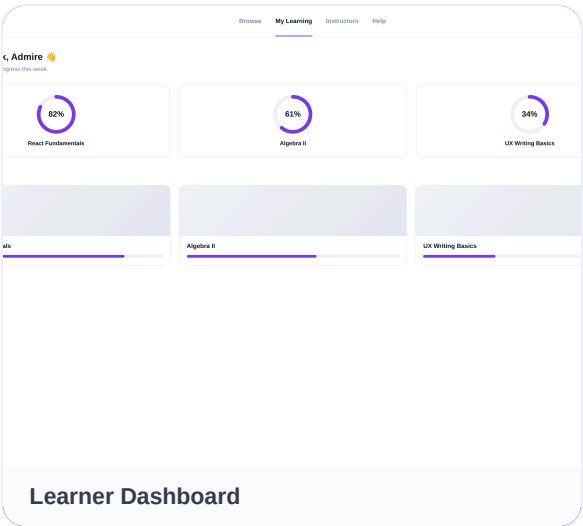

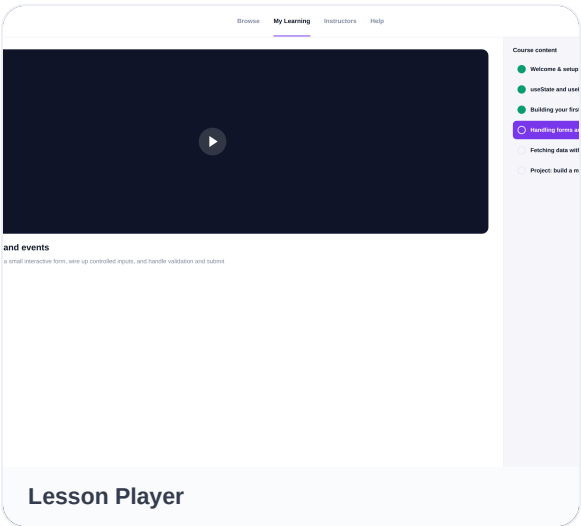

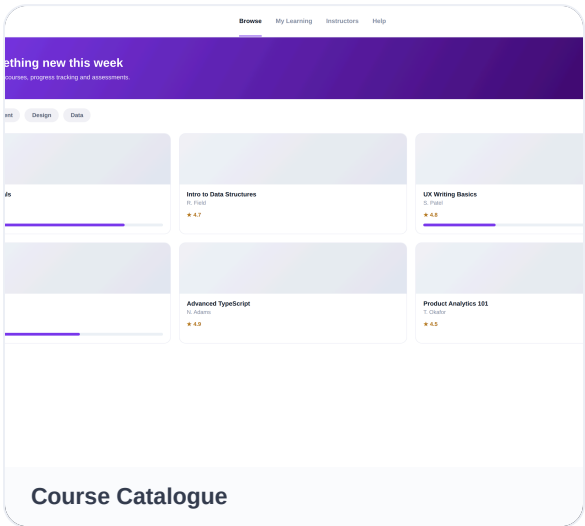

- Built the learner and instructor dashboards in React/Next.js and TypeScript
- Designed the PostgreSQL schema for courses, lessons, enrolments and progress
- Implemented progress-tracking and assessment-scoring APIs in Node.js
- Audited and improved keyboard navigation and accessibility across key flows

TECH STACK

- React
- Next.js
- TypeScript
- Node.js
- PostgreSQL
- Tailwind CSS
