

TalentHub

A recruitment and employee-management workflow tool.

ROLE	TYPE	CATEGORY
Full-Stack Developer	Personal / portfolio project	HR / People Operations

OVERVIEW

TalentHub is a recruitment and employee-management interface covering vacancies, candidate pipelines, interview scheduling, onboarding tasks and employee records, with permissioned access for HR, hiring managers and administrators.

KEY FEATURES

- Vacancy management with candidate pipeline stages
- Interview scheduling with calendar-style views
- Onboarding task checklists for new hires
- Employee records with permissioned, role-based visibility
- Workflow dashboards summarising pipeline health across open roles

MY CONTRIBUTIONS

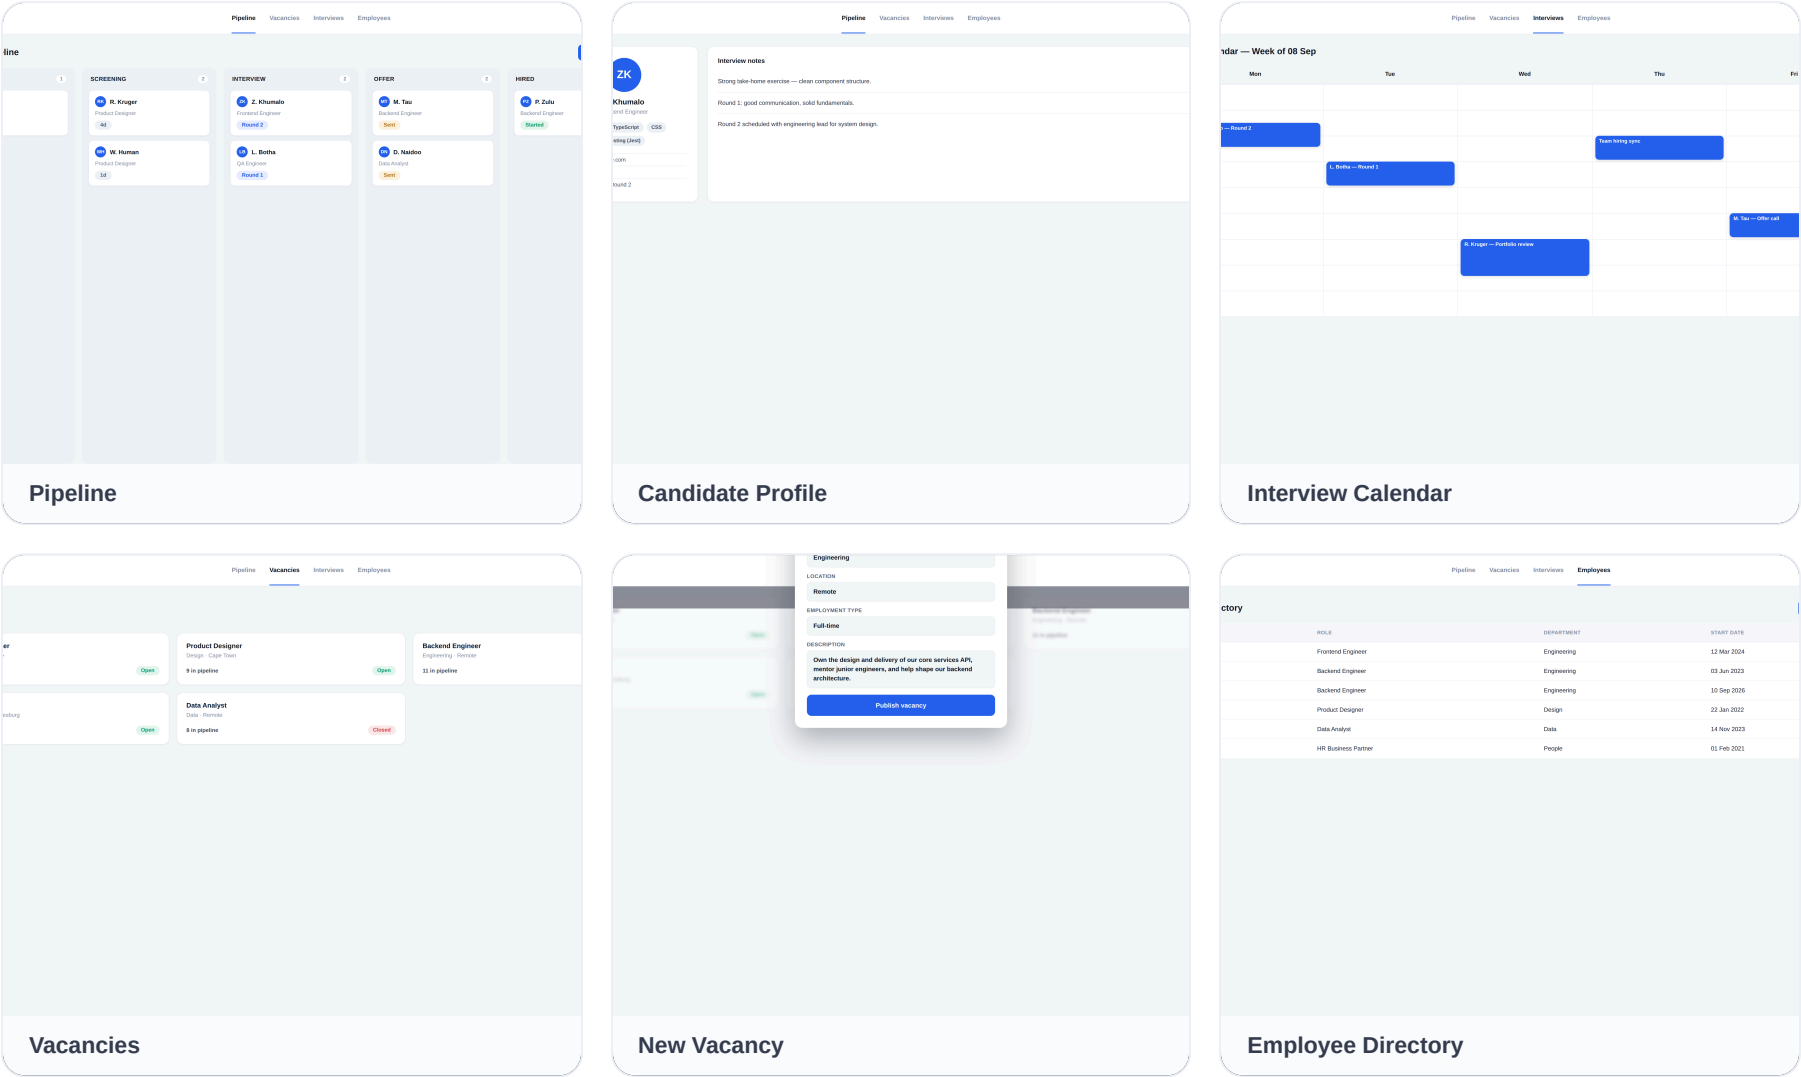

- Built the candidate pipeline and interview-scheduling UI in React/Next.js and TypeScript
- Designed the PostgreSQL schema for vacancies, candidates, interviews and onboarding tasks
- Implemented permissioned employee-record views in the Node.js API
- Configured GitHub Actions for automated testing and deployment checks

TECH STACK

- React
- Next.js
- TypeScript
- Node.js
- PostgreSQL
- GitHub Actions
