

ADMIRE T. NDANETA

Full-Stack Software Engineer | Full Stack Developer | React / Next.js / TypeScript / Node.js

Johannesburg, South Africa (Remote) | +27 81 844 1047 | ndanetaadmire@gmail.com

LinkedIn: [linkedin.com/in/admire-ndaneta-a3272711a](https://www.linkedin.com/in/admire-ndaneta-a3272711a) | Portfolio: admire-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 6+ years of experience designing, building, testing, and maintaining scalable enterprise web applications and SaaS products. Strong hands-on experience across the React, Next.js, TypeScript, JavaScript, Node.js, Express.js, PostgreSQL, MongoDB, and AWS ecosystem, with experience delivering responsive frontends, RESTful APIs, database-backed systems, reusable component libraries, real-time features, and production performance improvements. Experienced in end-to-end feature ownership, API integration, automated testing, CI/CD, accessibility, SEO, Core Web Vitals, code review, mentoring, and translating business requirements into maintainable technical solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS, SQL

Frontend: React.js, React, Next.js, React Native, Redux, Tailwind CSS, Webpack, responsive UI, accessibility, SEO

Backend: Node.js, Express.js, Django, REST APIs, RESTful APIs, microservices, API development, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, relational database architecture, SQL query optimization

Cloud & DevOps: Amazon Web Services (AWS), Vercel, GitHub Actions, CI/CD, Git, GitHub

Testing & Quality: Jest, React Testing Library, automated testing, component testing, integration testing, debugging, code review

Engineering: Full-stack development, SaaS architecture, multi-tenant systems, performance optimization, Core Web Vitals, code splitting, MVC, Agile, mentorship

AI & Modern Dev: AI-assisted development, prompt engineering, agentic coding workflows, responsible AI use, schema validation

PROFESSIONAL EXPERIENCE

FULL-STACK ENGINEER | Gerko | Remote

June 2023 – Present

Report directly to the CTO; manage and mentor a team of 3 junior developers. Product: app.gerko.io | Case study: admire-portfolio.vercel.app/projects/gerko

- Spearheaded end-to-end full-stack development of a multi-tenant healthcare Practice Management SaaS application, translating business requirements into scalable React, Node.js, Express.js, and PostgreSQL solutions.
- Designed and maintained a reusable React component library with Webpack and Jest, improving UI consistency and accelerating internal development velocity by 20%.
- Led data-driven performance optimization using telemetry and Core Web Vitals analysis, reducing initial page load times by 35% and improving the application's SEO performance.
- Designed secure, high-throughput RESTful APIs and backend microservices with Node.js and Express.js, supporting real-time data synchronization across segregated patient databases.
- Implemented automated component and integration testing practices that reduced production regression bottlenecks by 15%.
- Worked with business stakeholders, product teams, and non-technical clinic administrators to explain architectural changes, security considerations, APIs, and delivery trade-offs.
- Reviewed code and mentored junior developers on React, TypeScript/JavaScript, backend API design, testing, debugging, Git workflows, and maintainable software engineering practices.

REACT FULL-STACK DEVELOPER | Sasol | Hybrid

April 2021 – May 2023

Reported to the Engineering Delivery Lead within a cross-functional Agile pod.

- Delivered end-to-end features and production support for enterprise web applications using React, Next.js, and TypeScript, with emphasis on responsive UX, accessibility, reliability, and maintainability.

- Integrated Rocket Mouse capabilities into the workforce hub, enabling interactive task creation, dynamic forms, and real-time field-worker geolocation tracking through WebSockets.
- Optimized complex PostgreSQL queries and backend database interactions, reducing query latency by 40% for high-volume operational reporting.
- Debugged complex React state-management and rendering issues, contributing to 99.9% application uptime and improved production stability.
- Collaborated with UI/UX designers and backend engineers on REST API integration, secure authorization flows, responsive interfaces, and production releases.
- Participated in Agile ceremonies, technical troubleshooting, code reviews, testing, and continuous improvement across the development lifecycle.

JUNIOR FULL-STACK DEVELOPER | Tata Consultancy Services (TCS) | Remote

January 2020 – February 2021

Reported to the Regional Systems Engineering Manager.

- Contributed to frontend and API development for regional client accounts, including the RCS Merchant Portal and Standard Bank Engineering Connect App.
- Built responsive user interfaces using React and React Native and implemented Redux state-management patterns for transaction-focused applications.
- Built and documented RESTful endpoints connecting modern frontend applications to legacy financial databases and enterprise systems.
- Participated in software testing, debugging, environment troubleshooting, and rendering optimization while working within financial compliance requirements.

PROJECTS

Live full-stack projects across multiple industries. Full case studies with screenshots:

admire-portfolio.vercel.app/projects

Lwazi Hair – E-commerce / Shopify (Live client project)

Technologies: Shopify, Liquid, JavaScript, Yoco Payments, WhatsApp Business

Live Shopify store for a South African human-hair and wig retailer with a custom multi-step wig and bundle builder, live price calculation, auto-generated product codes, saved selections, Yoco card and EFT checkout, WhatsApp ordering and 85+ merchandised products.

Case study: admire-portfolio.vercel.app/projects/lwazi-hair | Live site: lwazihair.co.za

FinanceFlow – Financial Services Dashboard

Technologies: React, TypeScript, Next.js, Node.js, PostgreSQL, Tailwind CSS, GitHub Actions

Responsive financial dashboard for account balances, transaction history, transfers, beneficiary management, validation, audit events, and API-driven reporting. Designed around secure authentication flows, idempotent transaction requests, error handling, and responsive customer UX.

Case study: admire-portfolio.vercel.app/projects/financeflow

ShopSphere – E-commerce Platform

Technologies: React, Next.js, TypeScript, Node.js, MongoDB, Tailwind CSS, Vercel

Full-stack commerce application covering product catalogue, search and filtering, cart management, checkout workflow, customer accounts, order history, inventory-aware APIs, and responsive mobile-first interfaces.

Case study: admire-portfolio.vercel.app/projects/shopsphere

FleetFlow – Logistics & Field Operations

Technologies: React, TypeScript, Node.js, PostgreSQL, WebSockets, AWS

Operations dashboard for dispatching, driver/field-worker activity, location updates, task assignment, status tracking, and operational reporting with real-time UI updates.

Case study: admire-portfolio.vercel.app/projects/fleetflow

LearnHub – Education / EdTech

Technologies: React, Next.js, TypeScript, Node.js, PostgreSQL, Tailwind CSS

Learning platform covering course discovery, lessons, progress tracking, assessments, learner dashboards, instructor content management, and responsive accessibility-focused interfaces.

Case study: admire-portfolio.vercel.app/projects/learnhub

PropManage – Real Estate / PropTech

Technologies: React, TypeScript, Node.js, Express.js, MongoDB, AWS

Property management application for listings, tenant records, maintenance requests, document workflows, dashboards, search/filtering, and role-based access.

Case study: admire-portfolio.vercel.app/projects/propmanage

TalentHub – HR / People Operations

Technologies: React, Next.js, TypeScript, Node.js, PostgreSQL, GitHub Actions

Recruitment and employee-management interface for vacancies, candidate pipelines, interview scheduling, onboarding tasks, employee records, permissions, and workflow dashboards.

Case study: admire-portfolio.vercel.app/projects/talenthub

Knights-Nestle Management System – Retail Operations

Technologies: React, Node.js, responsive UI

Full-stack retail execution application for scheduling and tracking distributed merchandiser workflows and stock reports, with mobile-responsive React interfaces.

Case study: admire-portfolio.vercel.app/projects/knights-nestle

VibeCheck – Content / Social

Technologies: React, Node.js, Express.js, JavaScript

Mood-based blogging application with custom markdown rendering and React Reducer-based state management for multi-layered application state.

Case study: admire-portfolio.vercel.app/projects/vibecheck

EDUCATION & CERTIFICATIONS

- **BSc in Computer Science** | IU International University of Applied Sciences | In progress, expected 2027
- **Next.js & Vercel** | LinkedIn Learning | 2025 – Next.js App Router, server rendering, performance and deployment on Vercel
- **Amazon Web Services (AWS)** | LinkedIn Learning | 2025 – Core AWS services, cloud architecture and deployment
- **React – The Complete Guide (Hooks, Router, Redux)** | Udemy | 2023
- **Full Stack Web Developer Bootcamp** | Udemy | 2022 – JavaScript, the DOM, HTML, CSS, Tailwind CSS, Node.js, Express and PostgreSQL
- **A-Levels – Mathematics, Physics, Chemistry** | Cambridge International Examinations | 2012
